AGENTIC AI SECURITY, GOVERNANCE & BUDGET CONTROL

Simplified, at your fingertips.

EXECUTIVE BRIEF

KNOW WHAT YOUR AGENTS DO IN REAL-TIME, HOW THEY SPEND YOUR AI BUDGET AND CORRELATE EVERY ACTION WITH YOUR BUSINESS LOGIC

✓ DO YOU HAVE AN AGENTIC AI RISK EXPOSURE?

- 📅 Do you know how much of your AI budget each agent and workflow is consuming?
- 🔗 Do you control which corporate systems and data your agents can reach?
- 🔍 Can you show how an agent's actions relate to the business task it was given?
- ⏸ Can you stop or pause an agent mid-execution when it goes wrong?

If the answer to any of these is no, you have an agentic AI risk exposure.

🔗 THE CONTEXT INTELLIGENCE LAYER

Enforcement and cost tell you **what an agent did and what it burned**. Context Intelligence presents **the mosaic and the bigger pattern** — it tells you how your agent workflow execution correlates to your core business logic and flow. It answers the questions the leadership team actually asks:

- ? What data was accessed?
- ? Why was it accessed?
- ? What decisions were made?
- ? Why — and by whom — was it approved?
